

## Doctoral Researcher in Health Economics

Contract type: **Fixed-term until 30 June 2023**

Closing date for applications: **31 March 2021 / Reference code: 1741/21**

The **Department of Health Economics (DHE), Center for Public Health**, Medical University of Vienna is looking for a **doctoral researcher** in Health Economics to contribute to the European Personalized Medicine in Schizophrenia (PerMedSchiz) FWF-project. The position is **fixed-term until 30 June 2023** and can be filled as of **3 May 2021**. Salary and terms of employment are according to the collective contract (Euro 2.228,63/14x per year). The working language of the DHE is English.

### Job Description

Relevant work includes conducting literature reviews, epidemiological and health economic data collections, cost and outcome analyses and modelling. The position holder will overlook the day-to-day running of the project, analyze the relevant data, and develop and disseminate the study results including peer-reviewed publications.

### Application and Job Requirements

The successful candidate is expected to acquire and apply existing methodological approaches in health economics, contribute to other ongoing research and teaching activities of the DHE, and will be supported in developing own research interests in the field. The position holder will also have the opportunity to register for and conduct doctoral studies in the Doctoral Programme Public Health at the Medical University of Vienna alongside his/her work.

Applicants should have a topic relevant Masters degree, preferably in health economics or a related discipline (e.g. health services research, public health, economics). Equivalent demonstrable training and research experiences may be also considered. They should possess strong data analysis (Excel, SPSS, Stata, SAS, R or similar) and quantitative skills (statistics, econometrics). Applicants should have excellent written and spoken English and at least a working knowledge of German. A record of previous research publications and experience with health economic evaluations is positively valued. Additional requirements include enthusiasm, interest in multidisciplinary research, skill development and team work, and the ability to manage tasks professionally to agreed deadlines.
